AMOENA RECOVERY CARE

Total patient care
after breast surgery

COMPLETE CARE FROM THE START

Amoena Recovery Care products are designed to meet the specific needs of women immediately following breast or chest related surgeries and treatments, such as:

- Mastectomy/Lumpectomy
- Reconstruction
- Radiation (Brachytherapy)
- Augmentation/Reduction
- Any chest related surgery

Support, symmetry, comfort, and ease of use during the recovery process is essential following surgery—in the hospital and after returning home.

POST-SURGICAL CAMISOLES

- Soft, cotton fabric that soothes and comforts
- Full coverage with a snug but non-restrictive fit
- Cotton pockets that hold a post-surgical breast form or partial shaper securely in place
- Includes two #2106 Fiberfill Post-Surgical Forms and two #2107 removable drain pouches

Michelle Step-in option

Comes together in front with VELCRO® brand hook and loop fastener

Features and Benefits of Amoena Compression Garments

Controlled support from the side and around the surgery site helps the breast maintain its shape

Designed with flat seams to reduce irritation to wounds and sensitive skin, providing your patient with extra comfort

Adjustable front closure straps give you easy access to the surgical site

Seamless cups help with microcirculation for optimal wound healing

Soft, wide underband provides extra support

Compression Belt features a flap that attaches to the back of the garment that helps it stay in place. *(The flap can be folded if not needed.)*

POST-SURGICAL BREAST FORMS

- Temporary breast forms made from exceptionally lightweight, breathable cotton that protects sensitive skin
- Provides form and symmetry during the early days of recovery
- Designed to be worn in the pocket of an Amoena post-surgical garment

Weighted Leisure Form
with Comfort+ back fabric that helps reduce heat build-up

Style 132N
Sizes 3-14
Material Weighted foam: 30% Polyurethane, 70% Barium Sulfate (7727-43-7), a naturally occurring mineral in a powder form
Front: 100% COOLMAX® Polyester
Back: 100% Cotton
Insurance PDAC registration #26969359
HCPC Code L8020

Premium Priform
with a molded, seamless front

Style 216
Sizes 1/2-13/14
Material Front: 100% Polyester
Back: 100% Cotton
Insurance PDAC registration #19916424
HCPC Code L8030

Fiberfill Post-Surgical Form
ideal first form immediately after surgery

Style 2106
Sizes One size
Material 95% Cotton, 3% Spandex
Insurance PDAC registration #19916421
HCPC Code L8020

Post-surgical forms are filled with fiberfill which can be added or removed to adjust volume to the needed size

ADJUSTABLE ENHANCER

- Ultra lightweight, temporary breast form to provide shape and symmetry during the expansion process
- Silicone insert creates shape for a natural look
- Fiberfill allows volume to be adjusted for an individual fit
- Can be placed over the breast during the expansion process to provide a balanced look until the implant is in place

PurFit adjustable enhancer

Style 333
Sizes 4, 6, 8, 10, 12
Insurance PDAC registration #19916424
HCPC Code L8030

3 PARTS		FUNCTION
	Skin-friendly fabric cover	Soft and comfortable to sensitive skin and removable for washing
	Soft silicone insert	Provides shape and stability
	Completely adjustable	Adjust fiberfill to the required volume for perfect balance throughout a patient's expansion procedure

AMOENA BALANCE PARTIAL SHAPERS

- Designed to provide a natural shape to the breast after lumpectomy and also after reconstruction when contouring may be needed
- Soft, natural feeling shaper that fits into the pocket of a bra or can be worn directly against the skin
- Multiple options to provide the best fit based on the surgery site and the amount of missing tissue
- Integrated patented *Comfort+* temperature-equalizing technology absorbs body heat, which helps to reduce perspiration behind the partial shaper, keeping the patient comfortable during all-day wear
- **AMOENA BALANCE CONTACT** features a skin-friendly adhesive on the back layer that allows the partial shapers to adhere directly and securely to the body

AMOENA BREAST FORMS OVERVIEW

<p>CONTACT Attaches to the chest and feels most like a part of her</p> <p>Contact is a favorite for a lot of women because it follows every body movement naturally. The form distributes its weight more evenly on the chest, so it feels lighter while wearing and relieves stress on her shoulders and neck. This attachable form gives her a little more freedom in her clothing choices.</p>	<p>ADAPT Hugs and shapes to unique contours with its moldable back layer</p> <p>Every body and every scar is different. Adapt is a moldable breast form that hugs and shapes to the unique curves on her body. For uneven chests, Adapt offers an innovative design that ensures a closer fit to her chest wall, around tissue or scars, giving her a secure fit all day.</p>	<p>ENERGY Great for workouts and warm climates with more Comfort+</p> <p>Energy has more patented <i>Comfort+</i> than any of our other forms. It absorbs body heat into the breast form itself, to reduce perspiration behind the form. A pearl back surface allows air to flow behind the form, helping any moisture evaporate more quickly.</p>	<p>NATURA Moves with her body and drapes the most naturally</p> <p>Our most popular segment, Natura forms are designed to drape and move like a natural breast, even flattening when she lies down. Select Natura styles feature a soft, clear silicone gel back layer that hugs the body and is extra gentle to scar areas on her chest wall. Natura has always passed "the hug test," Because it performs so much like a real breast.</p>	<p>ESSENTIAL Designed to meet her essential, everyday needs</p> <p>Essential breast forms are super soft for all-day comfort. Select styles (Essential Deluxe) feature a clear gel back layer that hugs the chest wall and is gentle to scar areas. Essential breast forms give her a balanced, natural appearance in a bra and under clothing.</p>
--	--	---	--	--

Breast forms in these segments feature patented *Comfort+* technology. A phase-change material integrated into the form that absorbs body heat to help reduce perspiration behind the form.
