

Carbon Reduction Plan

Supplier name: Amoena UK Ltd

Publication date: 31-01-2024

Commitment to achieving Net Zero

Amoena UK Ltd is committed to achieving Net Zero emissions by 2045.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2022/23	
Additional Details relating to the Baseline Emissions calculations.	
Baseline emissions- UK have no prior Scope 3 Emission measures but Amoena UK Ltd have recently started to calculate these based on historical baseline data in comparison to our Global Headquarters in Germany. For example, Amoena UK Ltd have calculated as a percentage, the size of our UK facility vs that in Germany and the relevant outputs. Also, more specifically Amoena UK have used the units sold in each country to calculate scope 3 target from the existing work completed in Germany. Purchased goods make up 40% of scope 3 emissions.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	42
Scope 2	73
Scope 3 (Included Sources)	1131
Total Emissions	1246

Current Emissions Reporting

Reporting Year: 2023/24 estimated	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	40
Scope 2	71
Scope 3 (Included Sources)	1130
Total Emissions	1241

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 1050 tCO₂e by 2029. This is a reduction of 15%

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2022/23 baseline. The carbon emission reduction achieved by these schemes equate to less than 1 tCO₂e, a 0.1% reduction against the 2022/23 baseline and the measures will be in effect when performing the contract.

Amoena UK Ltd have made changes to our working from home guidelines to reduce travel and energy usage where appropriate.

We have also adjusted our office temperature control down by 1 degree to impact our overall heating energy usage.

In 2023, we have reduced our office carbon footprint by replacing all standard lights with energy conserving LEDs.

In the future we hope to implement further measures such as:

Amoena UK Ltd use only recyclable plastics, however a global project is in place to remove all virgin plastic elements within in our packaging and hangers to replace with 100% recycled plastics.

We are sourcing alternative energy mechanisms to support the operation of our UK facility.

We will give robust business travel guidelines to ensure we reduce flights and car travel to be replaced by some public transport and virtual meetings where appropriate.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
